

JONATHAN LE

San Jose, CA | (408) 667-1604 | jonathanlecontact@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

SKILLS

Languages: SQL, Python (Pandas, NumPy)

Tools & Platforms: Excel (VLOOKUP, Pivot Tables, Conditional Formatting), Power BI, Tableau, SSMS, PostgreSQL, BigQuery, Jupyter Notebook, Streamlit, Salesforce, Git/GitHub, VS Code

AI & Automation: Prompt Engineering, ChatGPT (GPT-4o), Claude (Code, Cowork)

Techniques: Data Cleaning & Transformation, KPI Reporting, ETL, EDA, Forecasting, Statistical Analysis, Business Intelligence, Data Modeling, Dashboard Development, Data Visualization

Certifications: Google Data Analytics Professional Certificate (Coursera), IBM Professional Data Analyst Certificate (Coursera), Associate Data Analyst in SQL (DataCamp)

EXPERIENCE

Google (TVC via Cognizant)

Mountain View, CA

Technical Support Engineer

Jan 2026 – Present

- Triaged and documented technical issues across 3+ AR/VR prototype workstreams using Buganizer (issue tracking), coordinating directly with Google Engineering teams to resolve bugs and maintain data integrity throughout product testing cycles
- Facilitated 1-on-1 prototype device testing sessions and executed end-to-end ETL operations on participant session data - collecting, validating, and delivering structured datasets to engineering and AI/ML teams to accelerate iterative AR/VR product development
- Cleaned and validated complex datasets using SQL and Google Sheets, improving data accuracy and consistency to support reliable dashboards and performance tracking used by leadership for operational decision-making
- Analyzed and visualized weekly operational KPIs: attendance, feedback, and performance using Agile (Scrum) workflows, delivering actionable insights and ad hoc reporting to a 10+ person cross-functional team to reduce operational bottlenecks

City of Milpitas

Milpitas, CA

Legislative Intern | Program Coordinator Intern | Policy Data Intern

Aug 2022 – Nov 2024

- Analyzed service request and program performance data in Excel across multiple programs to surface workflow inefficiencies, directly improving departmental reporting accuracy and inter-team response coordination
- Collaborated cross-functionally with multiple city departments to collect, clean, validate, and standardize data for performance reporting, ensuring data governance, integrity and consistency across legislative and operational deliverables
- Leveraged Excel to synthesize budget, policy, community engagement datasets across into stakeholder reports, executive PowerPoint briefings and data-driven policy recommendations for City Council decision-making

PROJECTS

PwC Performance Dashboard (Power BI, DAX, Excel)

Oct 2025

- Built an interactive Power BI dashboard analyzing 45K+ call center records, tracking CSAT and average handling time, demonstrating ability to translate large operational datasets into executive-ready reporting
- Automated YTD and YoY KPI calculations with DAX measures, eliminating manual calculation errors and ensuring consistency across all KPI reporting
- Designed visual reports and KPI cards to evaluate agent performance, enabling data-driven workforce optimization

Car Sales Dashboard (Tableau, SQL, Excel)

Aug 2025 – Sep 2025

- Developed a Tableau dashboard analyzing 24K+ car sales totaling \$371M, surfacing dealer and regional performance metrics to showcase end-to-end dashboard development from raw data to actionable visual insight
- Automated growth and YTD calculations using Tableau LOD expressions, eliminating the need for manual calculation and highlighting proficiency in advanced Tableau functions beyond basic charting
- Visualized sales by body style, color, and dealer region, uncovering customer preferences and geographic demand patterns

EDUCATION

COOP Careers – Data Analytics Fellowship

Expected June 2026

- Completed a highly selective 16-week fellowship, mastering data cleaning, transformation, analysis, and visualization using SQL, Python, and Tableau to deliver client-facing analytical work
- Accumulated 200+ hours of hands-on instruction in data tools and professional development, applying skills to real company projects and building a foundation for immediate contribution in a data analyst role

San Jose State University – Bachelor of Science in Business Administration, Management Information Systems

May 2025
